SUPERIOR MEDICAL
INTERPRETATION
SERVICE

Quality Response System

Introducing our **NEW** Quality Response System
Monitoring, Measuring & Reporting Interpretation Service
Quality, 24 Hours a Day, 7 Days a week.

Insync Interpreters is pleased to announce the release of our Quality Response System (QRS) designed to monitor, measure and report on the quality of our interpretation services. With this new feature only from InSync Interpreters, your staff can now rate and provide feedback on any or all interpreter services that we provide. With QRS you'll be able to chart and track quality of services immediately and overtime. QRS collects feedback and comments from the healthcare provider along with InSync's responses and generates a custom report on a monthly basis detailing the quality of services. This is the latest innovation from InSync Interpreters showing our commitment to excellence in medical interpretation.
